

Jonathan McCredie, AIA, Principal

Co-founder and managing principal of Fennick McCredie Architecture, Jonathan McCredie has over twenty-five years of experience leading a wide range of project types, specializing in aviation architecture. His project experience is broad, including over two dozen international and general aviation airports in ten states throughout New England and the Mid-Atlantic region, and encompasses the many facets of programming and planning, renovation and repairs, technical and aesthetic design, project controls, and sustainability. Completed projects include Passenger Terminal, ARFF, SRE, Hangar, Parking Garage, Air Cargo, and aviation support buildings, many receiving aviation and architecture industry recognition and awards.

Jonathan's guiding principle is to encourage greater involvement of clients, constituents and advocates, to the benefit of both the quality of the architecture itself and its ultimate role within the community of airport passengers, tenants, operators and staff. The majority of Jonathan's projects are complex in nature - involving renovation to active, occupied public buildings, requiring detailed phasing strategies and close coordination with all project stakeholders and building users.

Jonathan is a registered architect in Massachusetts, Connecticut, Maine, Delaware, and New Jersey. For the past three years he has served as a guest lecturer at Northeastern University School of Architecture. Jonathan received a Bachelor of Architecture degree from Cornell University.
